To Whom it May Concern

Re: Buesing Corp.

Subject: Letter of Recommendation

I have worked with Buesing Corp. for the past fifteen years on numerous projects including the Mayo Proton Therapy Project and the Terminal 3 Renovations at Phoenix Sky Harbor Airport. I have found them to be highly committed to ensuring a safe jobsite while producing quality work in a cooperative atmosphere.

I have found that involving the Buesing team in the early planning of the building structure has proven to be highly beneficial for scheduling and planning of an efficient and well run project. Their expertise with fast track project's and understanding of the overall building process has made them an important team member on many complicated projects. Buesing's management has always made sure that their staff has been provided with clear direction while working well with Hunt to ensure that the project priorities are achieved and ensuring a successful project.

I would recommend Buesing as a key team member for any project that you may be considering without hesitation.

Please call me if you have any questions at (602) 225-9500.

Sincerely,

A handwritten signature in black ink, appearing to read 'Raymond Libonati', written over a white background.

Raymond Libonati  
Vice President
